

# 5500 Ranch Body

Some Optional Equipment May Be Shown.

## Lasting Performance

The Vulcan 5500 Ranch Body is tailor engineered to mount on medium duty trucks. Higher GVW chassis, along with Vulcan's Ranch body, are ideally suited for hauling RV's, horse trailers, or race trailers. These chassis add an extra margin of safety providing more braking power, horse power and component life. Our fit, finish and refined style compliment any chassis. You'll be sure to get a second look when driving a Vulcan Ranch Body! Best of all, the Vulcan Ranch Body is assembled and engineered to provide years of trouble free service. The Ranch Body is manufactured with the same material, engineering standards and quality that make Vulcan's towing and recovery equipment so popular. For more information on the Ranch Body contact your local Vulcan distributor.
