

MITT-ILC WECANX2.0 Software Revision Tracker:

General note:

Two unique MITT-ILC configuration files now exist:

Standard Configuration File (WECANX Lightbar)

- MITT-ILC WECANX V46.wln

Generic Configuration File (Generic Lightbar)

- MITT-ILC GENERIC V2.wln

See below for update details; see supplemental PDF: MITT-ILC GENERIC V2.

V46) 6.23.2025

1. Automatic DVI enable at Night – Pin J9-4 CEM1607. In this mode, if the Lightbar photocell sees night , for more than 4 seconds, it will automatically turn on the DVI button. Then, anytime a flashing light is turned on (Beacon, Side Beacon, Aux Beacon etc) it will be automatically in night mode (DVI patterns).
2. Tunnelbox Swivel lights now come on with left or right dock lights.
