

New Defibrillator at SHC

Jackie Stanfield, September 3, 2024

You may notice a new piece of first aid equipment on the wall to your left as you enter the breakroom. After you pass the restrooms, just before the microwaves, there is now a defibrillator available to use in case of emergency.

However, the equipment is only useful if people know how to use it!

It can be intimidating to think of needing the defibrillator, but it is actually quite easy to use.

Please take two minutes to view this YouTube video that illustrates the steps to follow if you ever need to use the defibrillator in an emergency.

[How to Use the Zola AED Plus](#)

This knowledge could help you save someone's life!

To illustrate where to find the equipment, I have included a few photos.

If you have any other questions, please reach out to Amanda Morgan in HR for assistance.
