Miller Industries Towing Equipment Inc.
8503 Hilltop Drive
Ooltewah, Tennessee 37363
Phone (423) 238-4171 • FAX (423) 238-5371

FORM NO. 0501664
11 / 2007
PRICE \$25.00

LIMITED WARRANTY

MILLER INDUSTRIES TOWING EQUIPMENT INC., hereinafter referred to as MILLER, warrants to the original purchaser that each new MILLER wrecker or other MILLER products will be free from defects in material and workmanship for a period of twelve (12) months from date placed in service, but in no event shall such warranty period exceed twenty-four (24) months from date of manufacture by MILLER. The purchaser must promptly notify MILLER in writing of any failure in material or workmanship. In no event shall MILLER accept such notification later than twenty-four (24) months from date of delivery or twelve (12) months from date placed in service, whichever is earlier.

MILLER's obligation under this warranty, statutory or otherwise, is limited to the repair or replacement at the MILLER factory, or at a point designated by MILLER, of such part or parts as shall appear upon inspection by MILLER to be defective in material or workmanship. New or remanufactured parts will be used for any replacement at MILLER's option. This warranty is not transferable. This warranty does not obligate MILLER to bear the cost of labor or transportation charges in connection with the repair or replacement of any parts found to be defective, nor shall it apply to a product upon which repairs or alterations have been made unless authorized by MILLER.

EXCEPT AS EXPRESSLY SET FORTH IN THIS WARRANTY, MILLER MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, AND HEREBY DISCLAIMS ALL OTHER WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. MILLER shall in no event be liable for claimed downtime, claimed loss of profits or goodwill, or any other special, incidental, indirect, or consequential damages concerning or relating to any product or parts, whether based on negligence, strict liability, breach of contract, breach of warranty, misrepresentation or any other legal theory, regardless of whether the loss resulted from any general or particular requirement which MILLER knew or had reason to know about at the time of sale.

MILLER MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE FINISHED PRODUCTS MANUFACTURED OR SUPPLIED BY ANOTHER MANUFACTURER AND SUPPLIED BY MILLER TO PURCHASER, including, but not limited to, any vehicle to which a MILLER product may be affixed or any accessories or wire rope, and MILLER EXPRESSLY DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AS TO SUCH EQUIPMENT OR PRODUCTS. This language shall in no way affect or diminish the rights of the purchaser to rely on such warranties as are extended by such manufacturers or suppliers. MILLER shall, to the extent permitted under applicable law, pass on to the purchaser such manufacturer's or seller's warranty.

MILLER, whose policy is one of continuous improvement, reserves the right to improve its products through changes in design or materials as it may deem desirable without being obligated to incorporate such changes in products previously sold. This warranty is not intended to cover or include the following items, which are set forth by way of example and not limitation:

- A. Normal deterioration of trim, paint, lettering, and appearance items due to wear or exposure to weather, road conditions, road treatments, etc.
- B. Any damage or defect due to accident, misuse, abuse, improper or unauthorized repairs, failure to provide reasonable and necessary maintenance, or uses for which the equipment was not designed or intended.
- C. Alterations or modifications that affect performance, operation or reliability.
- D. Normal maintenance parts including, but not limited to, wear pads, bushings, wire rope, mud flaps, fenderettes, light bulbs, hydraulic oil, filters, and tow sling belts.

IT IS EXPRESSLY UNDERSTOOD THAT MILLER MAKES NO IMPLIED WARRANTY THAT MILLER PRODUCTS SHALL BE FIT FOR THE PURPOSE OF LIFTING OR MOVING PEOPLE OR FOR ANY OTHER IMPROPER USE.

Miller Industries Towing Equipment Inc.

SERIAL NUMBER

OWNER, USER AND OPERATOR:

Century appreciates your choice of our towing and recovery unit for your application. Our number one priority is user safety which is best achieved by our joint efforts. We feel that you can make a major contribution to safety if you, as the equipment owner and operator:

1. **Comply with Federal, State, and Local Regulations.**
2. **Read, Understand, and Follow the Instructions in this Manual.**
3. **Use Good, Safe Work Practices in a Common Sense Way.**
4. **Only have Authorized and Trained Personnel performing maintenance on the Towing and Recovery Unit.**

TABLE OF CONTENTS

**The operator must read and understand
all instructions in this manual before
performing maintenance on the unit.**

It is assumed by CENTURY that the Owner/Operator has a thorough knowledge of the accepted and lawful retrieval and towing methods as dictated by his city, county or state. CENTURY rejects any liability claim that may result from the incorrect or unlawful application of its equipment.

HYDRAULIC	III-4

Section I - MAINTENANCE

1.1 The continued operation of your CENTURY towing and recovery unit is largely dependent upon strict adherence to a properly scheduled preventive maintenance program. To help you in this program, CENTURY has provided the following information regarding lubrication, preventive maintenance, hydraulic system and safety devices care.

1.2 HYDRAULIC SYSTEM

The importance of absolute cleanliness of the hydraulic system cannot be over stressed. The smallest amount of grit, metal flake or other foreign material in the system can cause extensive damage to pumps, motors and valves. CENTURY has taken every measure to assure that each component and fitting was thoroughly cleaned before your unit was shipped to you. Therefore, servicing of the system should be done with extreme care.

- (a) Before checking oil level in reservoir, wipe away all dirt, grease and grime around filter cap before removing it. Make certain that all containers, funnels and pouring spouts are absolutely clean before filling reservoir.
- (b) When replacing hoses, fittings or other components, clean thoroughly, dismantle and reassemble carefully.
- (c) Failure to observe these precautions, and failure to change the filter element at regular intervals could result in loss of your warranty in the event of failure to certain components.

1.3 LUBRICATION & PREVENTIVE MAINTENANCE

The following general lubrication and preventive maintenance should be performed at least once per month for moderate usage, or more often as required, for heavy usage.

- (a) Inspect, repair or replace any worn, cracked, leaking, otherwise damaged components including, but not limited to, the following:

1. **Hydraulic Oil Filters**
2. **Oil Reservoir**
3. **Controls**
4. **Cables and Fittings**
5. **Hydraulic Hoses and Fittings**
6. **Lights and Wiring**
7. **Winches**
8. **Cylinders**
9. **Pivot Bearing Surfaces and Pins**

(See Lubrication Chart, page I-3.)

- (b) Check hydraulic oil level in reservoir and fill to center of sight gauge. Refer to 1.8, part (a), SUMMARY OF REQUIRED LUBRICANTS for recommended oils to use.
- (c) Replace hydraulic oil filters after first week of operation, then every three (3) months thereafter.
- (d) Inspect all bolts for tightness and re-tighten as necessary. Vibration and stress may loosen even properly torqued bolts. Refer to 1.4, BALL RACE MAINTENANCE for ball race retaining bolt procedures.
- (e) Lubricate all grease fittings on the unit including:
 1. **Bellcranks and Control Handle Shafts**
 2. **Winch & Winch Cable Tensioners**
 3. **Cables**
 4. **Cylinder Pivot Bearings**
 5. **Crossbar Pivot**
 6. **Boom and Underlift Slide Pads**
 7. **Boom End Swivels**

Section I - MAINTENANCE (cont'd)

1.3 LUBRICATION & PREVENTIVE MAINTENANCE (cont'd)

IMPORTANT!
THE BALL RACE SHOULD BE LUBRICATED EVERY 100 OPERATING HOURS UNDER NORMAL CONDITIONS WITH DRYDENE SFG; MORE OFTEN UNDER ADVERSE OPERATING CONDITIONS. SEE FIGURE 1.1 FOR LUBRICATION POINTS.

FIGURE 1.1

- (f) All bearing surfaces not equipped with grease fittings should be oiled using SAE 30 oil in a pump can.
- (g) Check oil level of winches and fill to level of oil plug located in side plate of gear housing. Use SAE 140 general purpose gear oil.
- (h) Lubricate winch cables using an oily rag while respooling cable onto drum. Special cable lubricants are available which have better penetrating qualities. Consult your local oil company for a list of these.

1.4 BALL RACE MAINTENANCE

IMPORTANT!
AFTER 100 HOURS OF OPERATION, THE BALL RACE RETAINING BOLTS SHOULD BE CHECKED FOR PROPER TORQUE VALUE. CHECK AS FOLLOWS:

- (a) Remove the access cover plate located on left hand side of recovery base, see Figure 1.2, to expose ball race retaining bolts. The exposed bolt will be identified as bolt No. 1, regardless of position on ball race, and used as a reference point for the following procedures. See Figure 1.3.

FIGURE 1.2

FIGURE 1.3

Section I - MAINTENANCE (cont'd)

1.4 BALL RACE MAINTENANCE (cont'd)

- (b) Check and re-torque ball race retaining bolt No. 1 to proper torque value of 680 ft. lbs. Refer to Figure 1.3.
- (c) Rotate boom 180° until access hole is over bolt No. 21; check and re-torque. Refer to Figure 1.3.

**MAKE CERTAIN HOUSE LOCK IS
RETRACTED BEFORE ATTEMPTING TO
ROTATE BOOM.**

- (d) Rotate boom 90° until access hole is over bolt No. 31; check and re-torque.
- (e) Rotate boom 180° until access hole is over bolt No. 11; check and re-torque.
- (f) Rotate boom back approximately 80° until access hole is over bolt No. 2; check and re-torque.
- (g) Repeat pattern until all 40 ball race retaining bolts are checked and re-torqued to proper torque value of 680 ft. lbs.
- (h) Check and re-torque recovery base retaining bolts (No. 1 thru 36) to proper torque value of 680 ft. lbs., following the same pattern used for the ball race retaining bolts.
- (i) Check ball race and recovery base retaining bolts every 600 hours thereafter for proper torque value.

1.5 SWING DRIVE GEARBOX MAINTENANCE

After the first 100 hours of operation, the Swing Drive Gearbox should be drained and refilled with EPGL oil. See Figure 1.4.

FIGURE 1.4

NOTE EXTREME PRESSURE MULTIPURPOSE GEAR LUBRICANT (EPGL)

This gear lubricant is compounded to achieve high capacity and meets the requirements of either API-GL-5 or MIL-L-2105. Unless otherwise specified, SAE 80W-90 viscosity may be used for year round service. Low temperature usage is restricted as follows:

SAE VISCOSITY NUMBER	MINIMUM AMBIENT TEMPERATURE °F (°C)
75W	-40 (-40)
80W	-15 (-26)
85W	+10 (-12)
90	+20 (- 7)
140	+40 (+ 5)
250	+50 (+10)

1.6 SWING GEAR LUBRICATION

Teeth of the swing gear should be lubricated on a monthly basis using Open Gear Lubricant (spray or brush-on).

Section I - MAINTENANCE (cont'd)

1.7 ROTARY HYDRAULIC SEAL

The Rotary Hydraulic Seal requires no maintenance other than periodic tightening of the hydraulic hose fittings should leakage occur. See Figure 1.5.

FIGURE 1.5

1.8 SUMMARY OF REQUIRED LUBRICANTS

(a) Hydraulic Oil

Examples:

1. **Texaco Rando HD 46**
2. **Shell Tellus Oil 46**
3. **Mobil Nuto H46**
4. **Exxon Nuto H46**
or EQUAL

(b) Winch Worm Gear Oil - SAE 140 general purpose gear oil.

Examples:

1. **Humble - Pen-O-Led EP #5**
2. **Phillips - Phillips Worm Gear Oil 140**
3. **Shell - Macona #978**
4. **Sinclair - Pennant EP #6**
5. **Standard - Stanogear #5**
6. **Texaco - Maropa #5**

- (c) **Grease** - Synthetic Fortified Grease such as **Drydene SFG**.
- (d) **Oil for Miscellaneous Bearing Surfaces** - SAE 30.
- (e) **Cable Oil** - SAE 30 or Special Purpose Cable Lubricant.
- (f) **Grease for Crossbar Pivot Pin** - Drydene SFG.

NOTE

THERE IS NO PRACTICAL WAY TO DETERMINE THE LIFE EXPECTANCY OF HYDRAULIC HOSES AND OTHER RUBBER COMPONENTS.

WHILE APPEARING TO BE IN EXCELLENT CONDITION, THESE COMPONENTS MAY BE ADVERSELY AFFECTED BY USAGE, WEATHER OR THE PASSING OF TIME.

THEREFORE, IT IS RECOMMENDED THAT ALL RUBBER COMPONENTS, ESPECIALLY HOSES, BE REPLACED EVERY FIVE (5) YEARS REGARDLESS OF APPEARANCE.

1.9 CARE OF HYDRAULICS IN COLD CLIMATES

Regions subject to continuous sub-zero or arctic climates require special hydraulic fluids. Contact CENTURY or your local supplier for information regarding specific temperature requirements.

NOTE

THE FOLLOWING LUBRICATION REQUIREMENTS SHOULD BE SERVICED MONTHLY.

SERVICE MORE OFTEN IF THE EQUIPMENT IS USED FREQUENTLY.

Section I - MAINTENANCE (cont'd)

1.10 LUBRICATION

1. Winch Oil Level - SAE 140 gear oil to proper level.
2. Hydraulic Reservoir - recommended hydraulic fluid to proper level.
3. Hydraulic Filters - Replace after first week of operation, then every three (3) months.
4. Cable - Use oily rag or approved cable lubricant.
5. Cylinder Pivot Bearings - use synthetic fortified grease.
6. Outrigger Cylinders - use synthetic fortified grease.
7. Outrigger Tubes - coat with GP grease.
8. Boom Slide Pads (Top and Bottom) - use synthetic fortified grease.
9. Boom End Swivels - use synthetic fortified grease.
10. Sheaves - use synthetic fortified grease.
11. Control Handle Shafts - use synthetic fortified grease.

Section II - PARTS

This Section is provided by the manufacturer for the purpose of ordering any component part of the **1075S Recovery Unit** and **SDU/4 Underlift** that may be required when part replacement is necessary.

Be certain to use only original equipment replacement parts for warranty purposes as well as for keeping your **1075S Recovery Unit** and **SDU/4 Underlift** in its original state and optimum operating capacities.

When ordering replacement or spare parts be sure to provide the following information to the manufacturer's **Parts Department**.

1. **Manual Number & Date of Publication**
2. **Manual Page Number**
3. **Page Title**
4. **Reference Number of Part Desired**
5. **Part Number**
6. **Part Description**
7. **Quantity of Part Desired**

Providing this information will help ensure that the correct parts will be delivered to you in an expedient manner. Should additional information be required for repair or replacement of certain components, contact your Wrecker Manufacturer Authorized Representative.

The Manufacturer reserves the right, without notice or obligation, to improve or modify their products, which may change the specifications, models and feature availability.

Section I - MAINTENANCE (cont'd)

1.12 FILTER/REGULATOR OPERATION AND SERVICE

- (a) The miniature filter/regulator and miniature lubricator are installed on the aft bulkhead of the left rear control station. See Figure 1.6.

FIGURE 1.6

- (b) The filter/regulator and lubricator are installed upstream from the device(s) they are to protect and lubricate.
- (c) Both free moisture and solids are removed automatically by the filter/regulator.
- (d) Drain whenever water level in sump reaches the lower baffle.
- (e) The filter element should be removed and replaced whenever the pressure differential across the filter is 10 PSIG.
- (f) To remove the filter element: SHUT AIR LINE DOWN and exhaust the primary and secondary pressure.
1. Unscrew threaded bowl.
 2. Unscrew element and remove.
 3. Clean bowl and internal parts before reassembling.
4. Attach clean element assembly and tighten firmly.
5. Replace bowl gasket; lubricate gasket to assist in retaining it in position. Use only mineral base oils or grease. DO NOT use synthetic oils such as esters, and DO NOT use silicones.
6. Screw bowl into body and tighten firmly.
- (g) The regulator may be serviced without removing it from the line. Before disassembling filter/regulator, SHUT OFF AIR SUPPLY AND EXHAUST PRIMARY AND SECONDARY PRESSURE. Disengage the adjusting knob by pulling upward. Turn the adjusting knob counterclockwise until compression is released from pressure control spring. For servicing diaphragm, unscrew bonnet from body. For servicing poppet, remove threaded bowl and filter element assembly.
- (h) BEFORE TURNING ON AIR SUPPLY, TURN THE ADJUSTING KNOB COUNTERCLOCKWISE UNTIL COMPRESSION IS RELEASED FROM PRESSURE CONTROL SPRING. Turn on air pressure. Then proceed to adjust the desired downstream pressure by turning adjusting knob clockwise. This permits pressure to build up slowly in the downstream line.
- (i) To decrease regulated pressure settings, always reset from a pressure lower than the final setting required. For example, lowering the secondary pressure from 80 PSI to 60 PSI is best accomplished by dropping the secondary pressure to 50 PSI, then adjusting upward to 60 PSI.
- (j) When desired secondary pressure settings have been reached, push the adjusting knob down to lock.

Section I - MAINTENANCE (cont'd)

1.13 LUBRICATOR OPERATION AND SERVICE

- (a) FILLING - Inlet pressure must be eliminated before the fill plug or bowl is removed. Fill to fill line on the bowl (DO NOT OVERFILL) with oil of 100 to 200 SSU viscosity at 100° F and an aniline point greater than 200° F - same as SAE No. 10 (petroleum base hydraulic oils are good examples). DO NOT USE OILS WITH ADHESIVES OR TACKY ADDITIVES. COMPOUNDED OILS CONTAINING SOLVENTS, GRAPHITE, SOAPS OR DETERGENTS (automotive oils generally contain detergent) ARE NOT RECOMMENDED.
- (b) Replace the fill plug and/or bowl assembly firmly - excessive torque is not necessary. The lubricator is now ready for setting. Repressurize the lubricator.
- (c) OIL DELIVERY ADJUSTMENT - To adjust oil delivery, turn adjustment knob on the top of the lubricator.
 - Leaner - Clockwise
 - Richer - Counterclockwise

By counting the number of drops per minute in the sight dome, you can adjust to your requirements. 25 drops per minute equal one ounce per hour - volume of oil passing through sight dome.

NOTE: This is a constant density type lubricator which delivers a constant ratio of oil air flow. Therefore, if air flow increases or decreases, oil delivery will be adjusted proportionally. ONLY IF A DIFFERENT RATIO IS DESIRED SHOULD YOUR ADJUSTMENT KNOB SETTING BE CHANGED AFTER YOUR INITIAL SETTING.

- (d) MAXIMUM PRESSURE AND TEMPERATURE - 90 PSIG @ 125° F.
- (e) TO CLEAN POLYCARBONATE BOWLS, USE MILD SOAP AND WATER ONLY! DO NOT use detergents or cleansing agents, such as acetone, alcohol, benzene, carbon tetrachloride, gasoline, toluene, etc., which are damaging to this plastic.
